

Exploring DNA as Evidence

PREVIEW from Activities to Teach

Sampling of our DNA PowerPoint Lesson with worksheets & vocabulary cards.

DNA EVIDENCE
DNA EVIDENCE COLLECTION AND HOW IT IS USED IN FORENSIC SCIENCE

CRIME SCENE C -
Who's DNA matches the evidence collected at the crime scene?

DNA as Evidence Worksheet
Instructions: 1. Print the slides of the DNA 1 evidence information based on the PowerPoint Slide Show or PDF provided by your teacher.

FINDING DNA AT CRIME SCENES

- DNA is found in **every living cell** but that doesn't mean that DNA is always found at a crime scene.
- DNA can usually be extracted from **blood, semen, urine saliva,** and most **tissues** left at the crime scene.
- DNA can sometimes be extracted from **teeth, bones, sweat, and hair.**
- DNA can be **FOUND** on almost everything.

PLUS a 15 Slide PowerPoint Lesson with a full page PDF of each slide and 4 page student worksheet.
